Dr Arijit Das to give free coaching to chemistry students once in a month

By Our Correspondent

Agartala, Aug 25, 2015 : Tripura's internationally acclaimed chemistry scholar Dr Arijit Das has decided to give free coaching to chemistry students once in every month-on every second Saturday of each month. Dr Das, accompanied by the principal of Ramthakur College Dr Debabrata Goswami, had gone to meet the minister for school and higher education Sri Tapan Chakraborty in the latter's official residence yesterday in the morning. He had presented the minister with five copies of his published journal 'Education in Chemical Science and Technology' so that an initiative could be taken to ensure that the journal containing the sixteen methodologies and thirty six formulae devised by Dr Das could reach students from undergraduate to post-graduate level. The minister advised him to hold work-shops at district and subdivisional levels with school teachers of chemistry to popularise methodologies and formulae invented by him and also suggested introduction of free coaching. Dr Das at once agreed to the proposal and said that on every second Saturday in each month he would provide free coaching to students. The minister sincerely appreciated Dr Das's gesture and congratulated him on his success in inventing new methodologies and formulae for easier study of chemistry.
